

GLOBAL MEDICAL DOCTOR VALIDATION ASSOCIATION

Built on the Blockchain.
Vetted by the *Oracle*.

Validated Doctors

Vetted Therapies & Treatments

The 3 Vs

Verify, Vet, Validate

Our Vision

01 Verifying & Validating Doctors

To be a conduit providing a validated world database of doctors, in conjunction with existing respected global credentialing authorities and medical professionals as a reference point to meet the needs and well being of an aging population.

02 Vetting & Verified Medical Knowledge

To share knowledge amongst global doctors on various therapies and treatments.

Our Mission

01 Share knowledge

To share knowledge amongst global doctors on various therapies and treatments.

02 Verify and Vet

Verify and Vet Knowledge from Global Doctor Innovators and Digital Influencers.

Trusted Global Body

Be seen as an impartial, objective, trusted validating body.

Introduction

Validated Doctors. Access to the right therapies & treatments.

Trust is one of the greatest costs of doing business. In medicine and healthcare it is even more important. Validating doctors is becoming more and more difficult. We work closely with global association alliances to pool and validate credentials from existing, credentialing authorities, with a representative from their leadership in countries/regions around the world sitting on our Board of Directors.

Knowing what treatments and therapies are valid, available and which ones works together has become increasingly difficult, requiring new approaches. We work with our global network of association alliances to vet and verify accepted treatments and therapies, including FDA approved pharmaceuticals.

About Us

Digital Era Skills & Community Success

GMDVA provides diverse, quality, quick, digital innovation and upskilling including clinical decision making based on the latest vetted treatments and therapies from around the world.

Global Dashboard

We aim to provide a global dashboard of verified treatments and therapies, as well as a certified international directory of doctors and other medical professionals.

Global GMDVA Directory

Built on the Blockchain.

Vetted by the *Oracle*.

The Oracle

Credentials entered must first be valid in order for the blockchain to work. GMDVA has established a unique and thorough vetting process built for a digital era.

Transparency

Once validated by the GMDVA Proprietary “Oracle” that verification is put on the blockchain. It is transparent to all who is verified and who is not, while their actual documents are not visible, are held safely and securely.

What We Do

Digital Innovation

Healthcare Digital Innovation and Digital Upskilling for 8-10 million doctors and 30-40 million healthcare professionals.

Global Treatment & Therapy Decision Support

Doctors will know what treatments and therapies are available, how they work together using digital technologies

Our Values

Global Alliances

Recombination and Synthesis through Diverse Global Alliances manifest Innovations to Emerge.

Success in the New Norm

Sustainable sharing of knowledge, procuring needed supplies, providing diverse expert advisors and digitizing is a moral imperative.

Preparation

Planning and strategy is no longer enough. We must prepare for a digital future with humans at the center.

Our Service

01 Global Placement for Interns/Fellows/Residents

Providing network and connections for placement opportunities.

02 Knowledge sharing for Medical Schools

Providing “real life experiences” library of medical knowledge to 2900 medical schools globally

03 Global Volunteer Services

Matching service for volunteer organizations

Global Network of Alliances

Connect your association to a world of knowledge and experience.

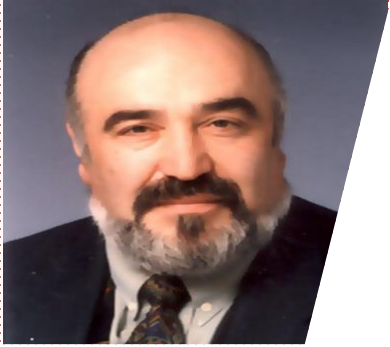

Via the GMDVA platform and ecosystem, medical associations, society and non-profit organizations are digitized to, communicate and collaborate with their own members and with other association members around the world.
